

Hospital Pressure Control Manifold and Signal Alarm

Acme Hospital Pressure Control Manifolds

Acme Hospital Pressure Control Manifolds are available for **liquid x liquid** or **liquid x gas** supply systems. They are available in one-half inch and one inch configurations.

Ordering Information

<u>Description</u>	<u>Supply Configuration</u>	<u>Part Number</u>
1/2"	Liquid x Liquid	274-822616
1/2"	Liquid x Gas	274-822615
1"	Liquid x Liquid	274-822042
1"	Liquid x Gas	274-822120

Acme's Hospital Pressure Control Manifolds are available in one half and one inch designs for liquid x liquid or liquid x gas medical gas supply.

HOSPITAL PRESSURE MANIFOLD IN CABINET

Acme Cryogenics' Hospital Pressure Control Manifolds are now available in a stainless steel cabinet. Your manifold is protected from accidental damage, weather, and other environmental dangers by the fully lockable, brushed stainless steel cabinet.

The cabinet is an option available when ordering.

Features

- Fully Lockable
- Weather resistant stainless steel
- Available with most 1" manifolds

Ordering Information

<u>Description</u>	<u>Supply Configuration</u>	<u>Part Number</u>
1"	Liquid x Liquid	274-823268
1"	Liquid x Gas	274-823521

Local Signal Panel

Local Signal Panel

Acme also offers **Local Signal Panels**, for use with your medical bulk oxygen supply system. 24 and 120 volt models are available to meet your system requirements. Models are available for use with **liquid x liquid** or **liquid x gas** supply configurations.

Ordering Information

<u>Voltage</u>	<u>Description</u>	<u>Part Number</u>
120	Liquid x Liquid	284-010704-1
120	Liquid x Gas	284-010704-2
24	Liquid x Liquid	284-060504-1
24	Liquid x Gas	284-060504-2

Local Signal Panel Stand

The **Local Signal Panel Stand** is an optional accessory available with the Local Signal Panel. The 6 ft. tall, aluminum stand can be attached to the floor using four bolts. 4 pre-drilled holes align with the screw-holes on the Local Signal Panel, allowing easy set up.

Ask about this stand when ordering your **Local Signal Panel**.

To ensure compliance with current NFPA requirements, Acme's Local Signal Panels provide a visual indication of an alarm condition.
